

ASBESTOS EVALUATION NOTICE

Address: _____

Date of testing: _____

Laboratory: _____

Summary of Results:

No Asbestos-Containing Materials (ACMs) Above 1% Detected

No materials were found to contain greater than 1% asbestos and therefore are not considered NESHAP-regulated asbestos-containing materials (ACMs). However, appropriate occupational safety measures must still be followed when disturbing any identified areas. Compliance with OSHA regulations regarding worker safety remains mandatory.

Asbestos-Containing Materials (ACMs) Above 1% Detected

Materials containing greater than 1% asbestos were identified. These are considered NESHAP-regulated asbestos-containing materials (ACMs). Prior to renovation or repair activities, all such ACMs that will be disturbed must be removed and properly disposed of by a licensed asbestos abatement contractor. These materials must be segregated from the general waste stream in accordance with applicable regulations. ACMs that will not be disturbed may remain in place, provided they remain intact and undamaged.
